CONTENTS OF VOLUME 91

NUMBER 1, OCTOBER 1987

LEON H. BRUNER, ROBERT W. BULL, AND ROBERT A. ROTH. The Effect of Immunosuppressants and Adoptive Transfer in Monocrotaline Pyrrole Pneumotoxicity 1

TSUTOMU SHIMADA, SEI-ICHI NAKAMURA, SUSUMU IMAOKA, AND YOSHIHIKO FUNAE. Genotoxic and Mutagenic Activation of Aflatoxin B_1 by Constitutive Forms of Cytochrome *P*-450 in Rat Liver Microsomes 13

LAURIE J. CARPENTER, KENT J. JOHNSON, ROBIN G. KUNKEL, AND ROBERT A. ROTH. Phorbol Myristate Acetate Produces Injury to Isolated Rat Lungs in the Presence and Absence of Perfused Neutrophils 22

LAURIE J. CARPENTER AND ROBERT A. ROTH. Involvement of Thromboxane in Injury to Isolated Rat Lungs Perfused with Phorbol Myristate Acetate in the Presence and Absence of Neutrophils 33

B. ALEX MERRICK, CAROLYN L. SMALLWOOD, JOHN R. MEIER, DEBORAH L. MCKEAN, WILLIAM H. KAYLOR, AND LYMAN W. CONDIE. Chemical Reactivity, Cytotoxicity, and Mutagenicity of Chloropropanones 46

BARRY D. GOLDSTEIN, DONNIE R. FINCHER, AND JOHN R. SEARLE. Electrophysiological Changes in the Primary Sensory Neuron following Subchronic Soman and Sarin: Alterations in Sensory Receptor Function 55

J. P. BUCHET AND R. LAUWERYS. Study of Factors Influencing the *in Vivo* Methylation of Inorganic Arsenic in Rats 65

MAIJA PESONEN, MALIN CELANDER, LARS FÖRLIN, AND TOMMY ANDERSSON. Comparison of Xenobiotic Biotransformation Enzymes in Kidney and Liver of Rainbow Trout (*Salmo gairdneri*) 75

DAVID A. EASTMOND, MARTYN T. SMITH, AND RICHARD D. IRONS. An Interaction of Benzene Metabolites Reproduces the Myelotoxicity Observed with Benzene Exposure 85

WANDE LI, YINZHI ZHAO, AND IIH-NAN CHOU. Paraquat-Induced Cytoskeletal Injury in Cultured Cells 96

BENOIT NEMERY, LEWIS L. SMITH, AND W. NORMAN ALDRIDGE. Putrescine and 5-Hydroxytryptamine Accumulation in Rat Lung Slices: Cellular Localization and Responses to Cell-Specific Lung Injury 107

MICHAEL S. LIDOW. Effect of Hydroxyurea on Differentiation of Mitotically Inactive Olfactory Receptor Cells in the Frog 121

J. ROSSOUW, J. OFFERMEIER, AND J. M. VAN ROOYEN. Apparent Central Neurotransmitter Receptor Changes Induced by Low-Level Lead Exposure during Different Developmental Phases in the Rat 132

SHORT COMMUNICATION

PETER J. GRAY AND RAYMOND M. DAWSON. Kinetic Constants for the Inhibition of Eel and Rabbit Brain Acetylcholinesterase by Some Organophosphates and Carbamates of Military Significance 140

IN MEMORIAM

ROBERT A. NEAL. Leon Golberg: Advocate for Science 145

ERRATUM

Volume 89, Number 2, June 30, 1987: Pauli Ylitalo, Heikki A. Elo, and Mauno M. Airaksinen, "Distribution of [^{14}C]Clodronate (Dichloromethylene Bisphosphonate) Disodium in Mice," pp. 287–292 147

ANNOUNCEMENT 148

NUMBER 2, NOVEMBER 1987

DAVID W. HERR AND HUGH A. TILSON. Modulation of *p,p'*-DDT-Induced Tremor by Catecholaminergic Agents 149

JAMES E. KLAUNIG AND RANDALL J. RUCH. Role of Cyclic AMP in the Inhibition of Mouse Hepatocyte Intercellular Communication by Liver Tumor Promoters 159

MICHEL CHARBONNEAU, EDWARD A. LOCK, JOSEF STRASSER, MICHAEL G. COX, MAX J. TURNER, AND JAMES S. BUS. 2,2,4-Trimethylpentane-Induced Nephrotoxicity. I. Metabolic Disposition of TMP in Male and Female Fischer 344 Rats 171

EDWARD A. LOCK, MICHEL CHARBONNEAU, JOSEF STRASSER, JAMES A. SWENBERG, AND JAMES S. BUS. 2,2,4-Trimethylpentane-Induced Nephrotoxicity. II. The Reversible Binding of a TMP Metabolite to a Renal Protein Fraction Containing α_{2u}-Globulin 182

JULIE L. EISEMAN, JORGE L. RIBAS, ELAINE KNIGHT, AND ALVITO P. ALVARES. Acute Nephropathy Induced by Gold Sodium Thiomalate: Alterations in Renal Heme Metabolism and Morphology 193

EMANUELA FELLEY-BOSCO AND JACQUES DIEZI. Fate of Cadmium in Rat Renal Tubules: A Microinjection Study 204

KEVIN D. WILLIAMS, MATTHEW S. MILLER, BYRON G. BOYSEN, AND RICHARD E. PETERSON. Temporal Analysis of Dithiobiuret Neurotoxicity in Rats and Assessment of Potential Nonneural Causes 212

BURHAN I. GHANAYEM, P. C. BLAIR, M. B. THOMPSON, R. R. MARONPOT, AND H. B. MATTHEWS. Effect of Age on the Toxicity and Metabolism of Ethylene Glycol Monobutyl Ether (2-Butoxyethanol) in Rats 222

KENNETH S. HIRSCH, DIX E. WEAVER, LARRY J. BLACK, JULIE F. FALCONE, AND NEIL J. MACLUSKY. Inhibition of Central Nervous System Aromatase Activity: A Mechanism for Fenarimol-Induced Infertility in the Male Rat 235

L. S. BIRNBAUM, M. W. HARRIS, D. D. CRAWFORD, AND R. E. MORRISSEY. Teratogenic Effects of Polychlorinated Dibenzofurans in Combination in C57BL/6N Mice 246

TATSUYA HOBARA, HARUO KOBAYASHI, TOSHIHIRO KAWAMOTO, SUSUMU IWAMOTO, AND TSUNEMI SAKAI. Intestinal Absorption of Trichloroethylene in Dogs 256

PHILIPPE LETTÉRON, CLAUDE DEGOTT, GILLES LABBE, DOMINIQUE LARREY, VERONIQUE DESCATOIRE, MARINA TINEL, AND DOMINIQUE PESSAYRE. Methoxsalen Decreases the Metabolic Activation and Prevents the Hepatotoxicity and Nephrotoxicity of Chloroform in Mice 266

ARNOLD GREENWELL, KONRAD E. TOMASZEWSKI, AND RONALD L. MELNICK. A Biochemical Basis for 1,2-Dibromo-3-Chloropropane-Induced Male Infertility: Inhibition of Sperm Mitochondrial Electron Transport Activity 274

ROBERT A. YOKEL AND HARRY B. KOSTENBAUDER. Assessment of Potential Aluminum Chelators in an Octanol/Aqueous System and in the Aluminum-Loaded Rabbit 281

SHORT COMMUNICATION

MICHAEL KELLEY AND DONALD A. VESSEY. The Effect of Pretreatment with 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin on the Hepatic Metabolism of 2,4,5-Trichlorophenoxyacetate (2,4,5-T) and 2,4-Dichlorophenoxyacetate (2,4,-D) 295

NUMBER 3, DECEMBER 1987

DAVID F. GARDNER, ROBERT D. UTIGER, SORELL L. SCHWARTZ, PHILIP WITORSCH, BRUCE MEYERS, LEWIS E. BRAVERMAN, AND RAPHAEL J. WITORSCH. Effects of Oral Erythrosine (2', 4', 5', 7'-Tetraiodofluorescein) on Thyroid Function in Normal Men 299

ERIC G. SPOKAS, OSMAN D. SULEYMANOV, STEPHEN E. BITTNER, JAMES G. CAMPION, RICHARD J. GORCZYNSKI, ALBERT LENAERS, AND GERALD M. WALSH. Cardiovascular Effects of Chronic High-Dose Atriopeptin III Infusion in Normotensive Rats 305

LORI A. DOSTAL, ROBERT P. WEAVER, AND BERNARD A. SCHWETZ. Transfer of Di(2-ethylhexyl) Phthalate through Rat Milk and Effects on Milk Composition and the Mammary Gland ... 315

YUTAKA MATSUOKA AND KAZUHIKO KUBOTA. Studies on Mechanisms on Diarrhea Induced by Fusarenon-X, a Trichothecene Mycotoxin from *Fusarium* Species: Fusarenon-X-Induced Diarrhea Is Not Mediated by Cyclic Nucleotides 326

YUTAKA MATSUOKA AND KAZUHIKO KUBOTA. Characteristics of Inflammation Induced by Fusarenon-X, a Trichothecene Mycotoxin from *Fusarium* Species 333

THOMAS A. MARKS, DIANN F. MORRIS, AND JAMES R. WEEKS. Developmental Toxicity of Alprostadil in Rats after Subcutaneous Administration or Intravenous Infusion 341

JAMES G. OMICHINSKI, GUNNAR BRUNBORG, ERIK J. SØDERLUND, JON E. DAHL, JAMES A. BAUSANO, JØRN A. HOLME, SIDNEY D. NELSON, AND ERIK DYBING. Renal Necrosis and DNA Damage Caused by Selectively Deuterated and Methylated Analogs of 1,2-Dibromo-3-chloropropane in the Rat 358

ROBERT L. CLARK, KIMBERLY ESCHBACH, WENDY A. CUSICK, AND JOSEPH F. HEYSE. Interactions between Caffeine and Adenosine Agonists in Producing Embryo Resorptions and Malformations in Mice 371

R. GINGELL, P. W. BEATTY, H. R. MITSCHKE, A. C. PAGE, V. L. SAWIN, L. PUTCHA, AND W. G. KRAMER. Toxicokinetics of 1,2-Dibromo-3-chloropropane (DBCP) in the Rat 386

DEBORAH A. THOMAS AND GERALD A. ROSENTHAL. Toxicity and Pharmacokinetics of the Nonprotein Amino Acid L-Canavanine in the Rat 395

DEBORAH A. THOMAS AND GERALD A. ROSENTHAL. Metabolism of L-[*guanidinooxy*-^{14}C]Canavanine in the Rat 406

C. A. LAWRIE AND A. G. RENWICK. The Effect of Saccharin Ingestion on the Excretion of Microbial Amino Acid Metabolites in Rat and Man 415

HARRIET KRUSZYNA, ROBERT KRUSZYNA, ROGER P. SMITH, AND DEAN E. WILCOX. Red Blood Cells Generate Nitric Oxide from Directly Acting, Nitrogenous Vasodilators 429

JACQUES MAGDALOU AND BRUCE D. HAMMOCK. Metabolism of Tridiphane (2-(3,5-Dichlorophenyl)-2(2,2,2-trichloroethyl)oxirane) by Hepatic Epoxide Hydrolases and Glutathione *S*-Transferases in Mouse 439

L. M. THURMOND, L. D. LAUER, R. V. HOUSE, J. C. COOK, AND J. H. DEAN. Immunosuppression following Exposure to 7,12-Dimethylbenz[*a*]anthracene (DMBA) in *Ah*-Responsive and *Ah*-Nonresponsive Mice 450

HIRO-AKI YAMAMOTO AND NARUMI SUGIHARA. Blood Ammonia Levels and Hepatic Encephalopathy Induced by CCl_4 in Rats 461

S. KACEW. Cationic Amphiphilic Drug-Induced Renal Cortical Lysosomal Phospholipidosis: An *in Vivo* Comparative Study with Gentamicin and Chlorphentermine 469

MANON VÉZINA AND GABRIEL L. PLAA. Potentiation by Methyl Isobutyl Ketone of the Cholestasis Induced in Rats by a Manganese–Bilirubin Combination or Manganese Alone 477

STEVEN G. GILBERT AND DEBORAH C. RICE. Low-Level Lifetime Lead Exposure Produces Behavioral Toxicity (Spatial Discrimination Reversal) in Adult Monkeys 484

SHORT COMMUNICATIONS

R. L. SHERWOOD, W. O'SHEA, P. T. THOMAS, H. V. RATAJCZAK, C. ARANYI, AND J. A. GRAHAM. Effects of Inhalation of Ethylene Dichloride on Pulmonary Defenses of Mice and Rats 491

CHRISTOPHER K. KELLING, LAWRENCE A. MENAHAN, AND RICHARD E. PETERSON. Effects of 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin Treatment on Mechanical Function of the Rat Heart 497

AUTHOR INDEX FOR VOLUME 91 506

CUMULATIVE SUBJECT INDEX FOR VOLUMES 87–91 508

CUMULATIVE CHEMICAL INDEX FOR VOLUMES 87–91 537

Information for Authors

Toxicology and Applied Pharmacology publishes original scientific research pertaining to action on tissue structure or function resulting from administration of chemicals, drugs, or natural products to animals or humans. Manuscripts should address mechanistic approaches to physiological, biochemical, cellular, or molecular understanding of toxicologic/pathologic lesions and to methods used to describe these responses. Papers dealing with alternatives to the use of experimental animals are encouraged.

A limited number of short reviews on subjects of timely interest to toxicologists will be considered. Communications, Announcements, and Letters to the Editor are discussed below.

Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript handling fee. The Society of Toxicology has established that a manuscript handling fee of $50.00, payable to the Society of Toxicology in United States currency, must accompany the original submission of the manuscript. The name(s) of the author(s) and the title of the manuscript must be included in the check identification information. In the event that this fee cannot be met by the authors or their institution, an explanatory letter must be sent to the Editor with the manuscript. The editorial decision regarding eventual acceptance or rejection of the manuscript will be independent of the submission of the handling fee.

Submission of manuscripts. All manuscripts should be submitted to:

Toxicology and Applied Pharmacology
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Form of manuscript. Manuscripts should be submitted in quadruplicate (one original and three photocopies), in English, including four sets of figures. All copies of halftone photographs and electron micrographs *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Papers in French or German can be considered for publication: authors should contact the Editor prior to submission. All manuscripts must be typewritten, double-spaced (including references) on one side of 8.5 × 11 in. white paper with 1 in. margins on all sides. Dot matrix printers should not be used.

Page 1 should contain the article title, the names and affiliations of all authors, an abbreviated form of the title (not to exceed 40 characters including letters and spaces) and the name, telephone number, and complete mailing address of the person to whom all correspondence should be sent. The article title should be comprehensive and descriptive: proprietary names must not be used in titles, but may be identified in footnotes.

Page 2 should contain an abstract starting with the title of the paper, followed by the authors' names and reference to *Toxicology and Applied Pharmacology*; blanks should be left so that the Editor may fill in the volume and page numbers. The abstract will be limited to 250 words but must contain a concise summary of what was done, the results obtained, and valid conclusions which are drawn therefrom. It must mention the compounds or families of compounds studied, their actions, and the species of animals. It must contain important words which are used as index terms, but not proprietary names.

Example: Immunoperoxidase Localization of T-2 Toxin. Lee, S. C., Beery, J. T., and Chu, F. S. (1984). *Toxicol. Appl. Pharmacol.* **72,** 228–235.

Format. The following text sections should be used.

Introduction. State why the investigation was carried out, note any relevant published work, and delineate the objective of the investigation.

Methods. New methods or significant improvements of methods or changes in old methods must be described. Methods for which adequate reference can be cited are not to be described. In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described: if an accepted code of practice has been followed, a reference to the relevant standards should be given. Details regarding animal housing conditions should be given.

Results. Duplication between the text of this section and material presented in tables and figures should be avoided. Tabular presentation of masses of negative data must be avoided and replaced with a statement in the text whenever possible. The statement must include (a) what was done, (b) how it was done, (c) how the data were analyzed, (d) a measure of variability, and (e) the significance of the result.

Discussion. This section must relate to the significance of the work to existing knowledge in the field and indicate the importance of the contribution of this study. Needless detailed recapitulation of the results must be avoided. Unsupported hypotheses and speculation should be omitted.

References. Names of authors are to be cited in the text with the year of publication in parentheses. When there are more than two authors use the first author's name followed by *et al.* All papers mentioned in the text must be listed in the reference list and vice versa. References should be listed alphabetically typed double-spaced on a separate sheet at the end of the paper with all authors included. Journal titles should be abbreviated according to *Chemical Abstracts Service Source Index,* 1985. Note the following styles for references.

Gerhart, J. M., Tilson, H. A., Hong, J. S., and Uphouse, L. L. (1983). Chlordecone-induced tremor: Quantification and pharmacological analysis. *Toxicol. Appl. Pharmacol.* **66,** 234–243.

Randall, C. (1977). Teratogenic effects of *in utero* ethanol exposure. In *Alcohol and Opiates* (K. Blum, Ed.), pp. 91–107. Academic Press, New York.

Cole, R. J., and Cox, R. H. (1981). *Handbook of Toxic Fungal Metabolites.* Academic Press, New York.

Footnotes should be identified in the text by superscript Arabic numerals and cited consecutively throughout the paper. All footnotes should be listed in order typed double-spaced on a separate sheet. Proprietary names of substances and names and addresses of suppliers should be identified in footnotes. If the paper has been presented orally in whole or in part, the date, and occasion should be included in a footnote.

Tables must be typed double-spaced on a separate sheet with the title typed directly above the table. Do not use abbreviations in the title. The title and footnotes must contain all the information necessary to understand and interpret the table without reference to the text. Tables must be numbered consecutively with Arabic numerals. Footnotes to tables should be identified by superscript lowercase letters ^{a,b} etc., and placed at the bottom of the page containing the table. Letters should be assigned to table footnotes alphabetically in order of appearance as the table is read *horizontally*, not vertically.

Figures should be numbered consecutively with Arabic numerals. All legends are to be typed consecutively on a separate sheet. All figures should be planned to fit the proportions of the printed page (5.5 × 8 in.; column width, 2.5 in.); wherever possible, figures will be reduced to single-column width. Lettering on the original figure should be large enough to be legible after reduction of the figure to single-column width (approximately 50 to 60%). *Differences in type size within a single figure should be no more than approximately 15%*. Standard mechanical lettering sets should be used. Characters should be approximately 3/16-in. high (Leroy lettering size 140). *In addition, symbols used to identify points within a graph should be large enough that they will be easily distinguishable after reduction.* Graphs should be plotted with black India ink on white paper no larger than 8.5 × 11 in. Grid lines that are to show must be inked in black.

All copies of halftone photographs and electron micrographs *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Photographs must be kept to a minimum. Photographs should be glossy prints (5 × 7 or 8 × 10 in.). Overlays indicating the parts of the electron micrographs that are to be emphasized must be used. Electron micrographs should be submitted not larger than 6.5 × 4.5 in. Magnifications should be indicated in the figure legends. Illustrations in color can be accepted only if the authors defray the cost.

Identify all figures on the back, in *pencil,* with authors' names and figure number, and indicate the TOP.

Index terms suitable for use in the subject index must be submitted on a separate sheet. The list should include chemical name, generic name, common name, and may include proprietary name of each important substance used in the experiments. It should also include biological activity of each substance investigated. Terms should elucidate important relationships.

Nomenclature. For styling of isotope, enzyme, and biochemical nomenclature, consult the Information for Authors of the *Archives of Biochemistry and Biophysics.*

Abbreviations. Units will be in general accordance with the International System (SI) as adopted by the 11th General Conference on Weights and Measures. Periods are not used after abbreviations (note exceptions, e.g. in. for inches).

Common abbreviations to be used in this journal are:

m	meter	ppm	parts per million
cm	centimeter	cpm	counts per minute
mm	millimeter	dpm	disintegrations per minute
μm	micrometer	sc	subcutaneous
nm	nanometer	ic	intracutaneous
kg	kilogram	im	intramuscular
g	gram	ip	intraperitoneal
mg	milligram	iv	intravenous
μg	microgram	po	oral
ng	nanogram	LD50	median lethal dose
ml	milliliter	LC50	medial lethal concentration
μl	microliter	Hz	hertz
mol	mole	°C	centigrade
M	molar	sec	seconds
mM	millimolar	min	minutes
μM	micromolar	hr	hours
N	normal	SD	standard deviation
Ci	Curie	SE	standard error
$\bar{x}$	mean	TLV	threshold limit value

Reprints. A reprint order form will accompany the proofs. Fifty reprints of each article (without covers) are supplied free of charge.

Communications. Toxicology and Applied Pharmacology will accept a limited number of brief reports of work that has progressed to the stage at which it is considered that the science of Toxicology would be advanced if the results were made available as soon as possible. These reports will be designated "Communications." Authors should submit short papers for this category of publication only when they believe that the rapid communication of the results is of the utmost importance to other investigators. The manuscript must be submitted in duplicate and conform strictly to the form and style of the journal. The length must be such that it will require no more than four pages in the present format of the journal, approximately 2500 words total.

Letters to the Editor. Letters to the Editor will be accepted for publication subject to Editorial Board approval, provided that the content deals with papers published in *Toxicology and Applied Pharmacology* and that the comments are of scientific value. Letters should be received within two months of mailing of the journal and should be no longer than 250 words. Introduction of new data will not be permitted. Each letter will be submitted to the author of the original paper in order that any reply may be published simultaneously with the letter.

Announcements: Toxicology and Applied Pharmacology will accept for publication announcements of interest to toxicologists such as notices of society meetings, symposia, or other matters.
